SECTION 1015 -- PREFORMED JOINT FILLER

1015.01 -- Description

Preformed expansion joint filler shall be furnished in strips of the dimensions specified in the plans.

1015.02 -- Material Characteristics

- 1. Nonextruding and Resilient Bituminous Type (Fiber Type) preformed joint filler shall conform to the requirements of AASHTO M 213.
- 2. Bituminous Type (Asphalt Type) preformed joint filler shall conform to the requirements of AASHTO M 33 except it will not be subject to a requirement for brittleness.
- 3. Preformed joint filler (sponge rubber type) shall be a flexible cellular rubber product meeting the classification requirements of the latest edition of ASTM D 1056 for Type 2, Class A or B, Grade 2 or 3, except that reclaimed rubber shall not be used in the manufacture of the material. The color shall be gray.

1015.03 -- Procedures

- 1. For structures, the bituminous type (asphalt type) shall be used, unless otherwise shown in the plans or specified in the special provisions.
- 2. Except for structures, the non-extruding and resilient bituminous type (fiber type) shall be used, unless otherwise shown in the plans or specified in the special provisions.

1015.04 -- Acceptance Requirements

- 1. Preformed joint fillers that are on the NDR Approved Products List are acceptable.
- 2. The preformed joint fillers may be accepted based on manufacturer's certification of compliance letters when they are not on the NDR Approved Products List.
